## **Notes:**

\*Watched training video on school safety and discussed the safety protocols that the school has and how we can implement different ideas.

\*One idea is with the safety of the parking lot and kids being all over the place. Talked about placing cones or signs for parents so they cannot come through when the buses are there.

\*Talked about Chrome books that are ordered but backed up on shipping them.

\*Mr. Palmer expressed concerns about technology getting used by younger and younger kids. That their attention spans are getting less and how it is affecting their learning.

\* The group talked about putting on more “camps” and small group “out of the classroom” type learning.

\*Everyone threw out ideas on the Day of Dec: Working outside on trails, cleaning yards or service in the community.

Discussed the parent teacher conference being done over zoom: Teachers thought it went well and parents seemed to like it and made it a bit more flexible for some.
